- Design, develop and deploy a mobile application allowing students to rent housing using hooks, maps, navigation, ...
- Analyze user requirements, design user-friendly interface, test the mobile app.
- Collaborate with the team and determine tasks.
- Followed Udemy courses to get some hands experience.

NODE JS DEVELOPER (PERSONAL PROJECTS)

As a Node JS developer, I'm responsible for designing, developing, and maintaining REST APIs I create. My primary duties are creating the Node JS project using the MVC architecture, analyzing the requirements, design and develop the API endpoints.

E-COMMERCE API

- Design and develop RESTful APIs using Node JS and Express JS for a e-commerce web api, including API endpoints for products, orders, reviews, payments and user management.
- Set up and maintain a MongoDB database, including data modeling and schema design to store and manage product, order, review, payment, and user data using mongoose.
- Implement authentication and authorization using JWT and cookies to manage user accesses and permissions.
- Develop and integrate Stripe payment gateway APIs.
- Implement error handling by creating error middleware.
- Maintain track of my codes using GitHub.

JOBIFY (MERN)

- Design and develop user interface for the job dashboard panel using React JS and related technologies such React hooks, Context API, React Router, Custom Hooks
- Develop the back end using Node JS and Express JS for the RESTful API that allow user to create, read, update and delete job and personal information.
- Use Axios to manipulate data from the API.
- Use MongoDB to store the application data.

Exercise:

CCNB Bathurst, NB Canada

- Resolutions of exercises focused on object-oriented programming with C ++ and Java
- Data resolution and manipulation with SQL, PL/SQL.
- Solving exercises and creating small mobile applications on Android Studio, swift and React Native.
- Carrying out exercises and applications in Swift.

Personal and Collective projects/exercices:

Bathurst, NB Canada

- Creation of a customer sales application (with data recording) in C #.
- Creation of a static travel website with Html, CSS and bulma.
- Realization of an online portfolio with Html, Css and Bootstrap.
- Realization of exercises linked with Javascript and JQuery.
- Realization of some exercises in PHP, ASP.NET, VB.NET.
- Realization of a calculator with Html, Css and Javascript.
- Creation of a mobile publishing application with React-Native.

EDUCATION

Programming and software device

Diplomat July 2021

Collège communautaire du Nouveau-Brunswick

Informatic science

October 2017 – June 2018

(Completed one year)

Protestant University of the Congo

Mathematics and Physics

Baccalaureate (high school diploma) August 2017

Collège Bonsomi

CERTIFICATES

- Safety at Work
- Salesforce administrator
- Salesforce app builder
- Salesforce platform developer 1
- Salesforce JavaScript developer 1
